

A technical cross-section diagram of a window frame assembly. The diagram shows a window pane at the top, with a frame below it. A thick black line represents the waterproofing mastic, which is applied to the frame and extends down the side of the wall. The wall is shown with diagonal hatching. The floor is indicated by a dashed line. A blue line represents the floor surface. An arrow points from the text 'Mastic d'étanchéité' to the mastic application. A dimension line at the bottom indicates a minimum width of 25 mm for the mastic application.

Mastic d'étanchéité

25 mm mini
